Zany Labs!

Zany Science Creative Writing Camp

Experience Creative Writing through FUN science activities!

Monday: Zany Rocketry—Make stomp rockets, do story mapping with Kidspiration software, and then do a “How To” paragraph. Play with the rockets in our motor gym.

Tuesday - Zany Physics - Explore friction through fun physics activities, do story mapping with Inspiration software, and then do a “comparison” writing assignment

Wednesday - Zany Chemistry - Do zany chemistry experiments, do story mapping with Inspiration software, and then complete a “persuasive” writing assignment”

Thursday - Zany Biology - Make models of germs and learn about good and bad germs. Do story mapping with Inspiration software, and then complete a “persuasive” writing assignment.

Friday” Zany Science Olympics - Test your skills in our cool Olympics! Then test your creative writing skills!

What is a typical class like?

Many students need help with creative writing skills. After they master handwriting, they still need to integrate handwriting into composition skills. Experience the coolest writing topics in our summer camps! Students will participate in FUN, science activities in order to give them a basis for a zany writing topic. We will print out shell outlines for students to write their own paragraphs. Next students will receive help from a degreed teacher in completing their writing assignments.

Students can write with handwriting with a hand held spell checker, or use keyboarding in our assistive technology lab using Write OutLoud software (www.donjohnson.com).

What is Write OutLoud software?

Write OutLoud software is a phonetic word processing program that allows a student who spells phonetically, to write paragraphs with very few misspelled words. No longer do they need to do “safe” writing with brief sentences of words they know how to spell. Write OutLoud corrects most phonetic and dyslexic spelling errors. This software has text to speech that allows a child to hear what they are writing.

What is the Children’s Talking Dictionary?

It is a handheld spell checker with the Write Outloud spelling dictionary built in. It allows students who use handwriting, to spell words correctly. Students will learn how to access this writing aide.
